

Back Panel Heading

HEART is dedicated to the concept that unbiased information concerning infectious diseases allows people to make informed decisions. With the understanding that infectious diseases have an impact on society-all aspects and unless the problem is acknowledged as a problem, nothing will be done to correct the problem.

 Kyasanur Forest disease virus.
Hantavirus
 hemorrhagic fever with renal syndrome (HFRS),
 the Crimean-Congo hemorrhagic fever (CCHF)
 the Rift Valley fever (RVF) virus
The Arenaviridae
 Lassa fever
 Argentine hemorrhagic fevers
 Bolivian hemorrhagic fevers

Unless precautions are taken, you could be at risk.

What you can do

- **Don't Assume that shop is using correct procedures—KNOW**
- **Are the work areas CLEAN**
- **Does the shop use disposable instruments**
- **Are disposable tools discarded into the trash before the next client**
- **Are hands washed between clients**
- **Are precautions taken against blood or body fluids when exposures occur**

Denial kills

Be aware of your surroundings

Not all blood borne diseases can kill but all it takes is one exposure to change a life forever.

Only you can be responsible for your health
